## **PENTAX** SPORT OPTICS PRICE GUIDE 2015

# Z-series

Offering the ultimate level of optical and build quality to achieve a brilliant view of your subject.

What you couldn't see before is suddenly so close you can almost touch it.

That's because PENTAX premium level quality and clarity are within reach, at a price that's within reach, too. Every Z-series model is built for critical observation. PENTAX: designed to delight the most demanding users. Designed to inspire the most dedicated enthusiasts.

- Premium multi-layer coatings assure the maximum light transmission through the binocular. The result is bright, crisp, true-to-life images in the widest range of viewing conditions.
- Specialized protective coating repels dust, water and grease to keep your optics clean and your image quality at its peak.
- Magnesium alloy construction balances durability and weight. The lightweight design is built to handle rough and tumble conditions of life's adventures.
- Hybrid Aspherical lens elements provide exceptional edge-to-edge sharpness. This assures that items on the edge of your field of view are just as sharp as those in the center.
- Phase coated roof prisms allow the maximum light transmission for sharp, high contrast images.
- Waterproof and nitrogen-filled (JIS Class 6) to handle the most extreme weather conditions (submersible to 1m).

# S-series

Superior quality full sized binoculars that are ideal for the widest range of lighting and weather conditions.

## Exceptional quality meets high-end expectations.

Large objective lenses incorporated in the design allow for contrast-rich, bright viewing under all light conditions.

- Large objective lens elements provide maximum light gathering capabilities and are perfect for use in low light conditions.
- Premium multi-layer coatings assure the maximum light transmission through the binocular. The result is bright, crisp, true-to-life images in the widest range of viewing conditions.
- Specialized protective coating repels dust, water and grease to keep your optics clean and your image quality at its peak. (SD Models Only)
- Rigid body construction makes these binoculars extremely rugged to maintain optical alignment. This ensures comfortable viewing throughout the life of the product.
- Waterproof and nitrogen-filled (JIS Class 6) to handle the most extreme weather conditions (submersible to 1m).

# A-series

Advanced compact models with premium quality features and build for all of life's adventures.

## Full-size performance in a compact-sized body.

All A Series binoculars offer you impeccable viewing quality in a compact, portable and durable design, so you can enjoy carrying convenience without compromising performance.

- Compact roof and porro prism models that balance small size and premium image quality. These binoculars are easily packable when small size and weight are critical but a high quality image is required.
- Premium multi-layer coatings assure the maximum light transmission through the binocular. The result is bright, crisp, true-to-life images in the widest range of viewing conditions.
- Durable construction includes fiber reinforced polycarbonate designs which combine light weight and rugged styling. The reinforced chassis is extremely rigid, but light enough to carry anywhere.
- Waterproof and nitrogen-filled (JIS Class 6) to handle the most extreme weather conditions (submersible to 1m).

# U-series

Compact, durable models ideal for use from the field to the theater.

## Don't miss a moment. Indoors or out.

PENTAX quality and clarity are within reach, at a price that's within reach, too. These compact porro-prism models feature a dual-axis, single body design with synchronized eyepiece adjustment. Aspherical lens elements give you edge-to-edge sharpness. Clear images and clearly affordable.

- Fully-multi-coated optics assure maximum light transmission resulting in high quality viewing. Every surface of every element is fully coated minimizing internal glare and flare and giving a bright clear view.
- Unique Uni-body design enhances durability by locking objective lenses in a single housing and synchronizing the eyepiece movement. This minimizes moving parts and assures these binoculars will function properly and clearly for years to come.
- Aspherical lens elements, which are critical in compact binoculars, provide exceptional edge-to-edge sharpness. This assures that items on the edge of your field of view are just as sharp as those in the center.
- The UP 8-16x21 Zoom and UP 10x21 and 8x21 models are offered in unique, attractive color options that match your personal style.
